

Business Analytics (MS)

This program is offered by the George Herbert Walker School of Business and Technology and is available at the St. Louis main campus, via Webnet+ and the San Antonio campus.

Program Description

Business analytics is the process of transforming data into insights to improve business decisions. The MS in Business Analytics focuses on developing and applying analysis and analytics skills to fulfill significant needs in the Business and Marketing field. Data understanding, data visualization, descriptive and predictive modeling are some of the tools used to create insights from data in the business context. Student will integrate business concepts as well as key methods and tools available for modeling, analysis, and solving challenging problems involving business and marketing data.

Learning Outcomes

By the end of the program, students will be able to:

- Understand and critically apply the concepts and methods of business analytics.
- Identify business problem, prepare and implement suitable analytical model.
- Interpret results and possible solutions.
- Identify appropriate courses of action for a given business and marketing situation.
- Create viable solutions to business decision making problems.
